

Application No.: 09/316,430  
Amendment dated: November 20, 2003  
Reply to Office Action of: May 22, 2003

**IN THE CLAIMS:**

Please amend claim 32 and add new claims 35-52, as indicated. A complete set of the claims is included below, reflecting added subject matter (*underlining*) and deleted subject matter (*strikethrough*), as well as the current status of each claim. This listing of claims will replace all prior versions, and listings, of claims in the application:

1 - 16. (Canceled)

Sub 201  
17. (Previously Presented) A computerized system for forming a computer based communications network of network members inclusive of network buyers and or network vendors for processing requests for proposal for goods and services through at least one central processing unit including:

C5  
operating system software for controlling the central processing unit, said network members being remotely located from said central processing unit and connected thereto via a communications channel, the central processing unit being coupled to a storage means containing identification of the network members,

means for network buyers to generate request for proposal for goods and/or services,

means for transmitting said request for proposal to said central processing unit,

filter means for filtering the network members in said storage means to determine which network members are to receive said request for proposal based upon filter conditions set up by the network buyer in said request for proposal or by the central processing unit in accordance with preestablished conditions,

means for broadcasting said request for proposal to the network members selected by said filter means, and

means for responding to the generator of said request with either a /response from the selected network members or with a list of said selected

Application No.: 09/316,430  
Amendment dated: November 20, 2003  
Reply to Office Action of: May 22, 2003

network members for said generator of said request to establish independent communication.

18. (Previously Presented) A computerized system as defined in claim 17 wherein said network members communicate via an on-line computer service through said central processing system.

19. (Previously Presented) A method for processing requests for proposal for goods and/or services from a party representing a buyer or supplier of goods and/or services through a computerized system forming a computer based communications network of network members for linking buyers to suppliers with the computerized system having at least one central processing unit including operating system software for containing the identification of the network members, wherein the method comprises the steps of:

receiving a buyer's request for proposal over a communication network;

selecting one or more appropriate vendors to be sent the buyer's request for proposal based upon filter conditions, set by the buyer, vendor and the network software;

transmitting the buyer's request for proposal separately to said selected vendors over said communications network; and with said selected vendors over said communications network; and

with said selected vendors communicating their proposals either directly to the buyer or to the computerized system which in turn transmits said received proposals to the requesting buyer.

20. (Previously Presented) A computerized system for engaging in transactions over a data network, said computerized system comprising:

a plurality of terminals, at least one of which being designated a requestor and others of which are designed vendor terminals;

Application No.: 09/316,430  
Amendment dated: November 20, 2003  
Reply to Office Action of: May 22, 2003

filter and broadcast means for receiving, over said data network, requests from said requestor to engage in transactions with unspecified vendor terminals, and for filtering said request to determine with which vendor terminals said requests should be matched; and

means for matching said requests with vendor terminals which meet predetermined filter conditions for generating quotes from information contained in a database associated with said vendor terminals, and for accepting said quotes from said vendor terminals, wherein the central database contains information that is insufficient to consummate the transaction.

21. (Previously Presented) The computerized system of claim 20 further comprising means for communicating responses from said vendor terminals to said filter and broadcast means; and

means at said filter and broadcast means for communicating a selected set of said responses to said requestor.

22. (Previously Presented) The computerized system of claim 21 wherein said transaction is a purchase, and wherein the purchase may comprise a plurality of items.

23. (Previously Presented) The system of claim 22 further comprising: means for establishing communications between said filter and broadcast means and said vendor terminals which meet said filter conditions; and means for determining whether a quote for said transaction from a particular vendor terminal meeting said filter conditions should be sent to said requestor.

24. (Previously Presented) The method of claim 23 wherein said communications is continuous.

Application No.: 09/316,430  
Amendment dated: November 20, 2003  
Reply to Office Action of: May 22, 2003

25. (Previously Presented) The method of claim 23 wherein said communications are periodic.

26. (Previously Presented) The method of claim 25 wherein said communications is initiated by said vendor terminal.

27. (Previously Presented) The apparatus of claim 20 wherein further comprising means for automatically notifying a buyer when particular items meeting specified conditions become available from a seller.

28. (Previously Presented) A method of purchasing goods or services over a data network comprising the steps of:

communicating, over said data network, to a filter means, at least one request for a proposal from a potential buyer of said goods or services;

filtering, at said filter means, the at least one request in order to ascertain a set of sellers potentially capable of supplying said goods or services; and

obtaining, from at least one of said potential sellers, over a data network, quotes to supply said goods or services, and forwarding said quotes to said potential buyer, wherein at least part of the quote information is stored at a location remote from said filter means.

29. (Previously Presented) The method of claim 28 further comprising the step of accepting filtering conditions from said potential buyer, and utilizing said filtering conditions in said step of filtering to determine a subset of potentially capable sellers.

30. (Previously Presented) The method of claim 28 wherein said step of obtaining comprises the step of each seller contacting said filter means at predetermined intervals and supplying bids in response to any requests for proposal that have arrived at

Application No.: 09/316,430  
Amendment dated: November 20, 2003  
Reply to Office Action of: May 22, 2003

said filtering means and that were determined, by the filter means, to be a request for proposal for goods or services which said each seller is potentially capable of supplying.

31. (Previously Presented) The method of claim 28 wherein said step of obtaining comprises the step of automatically and periodically supplying the filter means with information sufficient to assemble a bid, and sending the bid to said potential buyer via e-mail.

32. (Currently Amended) A method of matching buyers of goods and services with sellers of goods and services over a data network comprising the steps of:

communicating, from buyers to a filter means, requests for proposals (RFPs);

filtering said RFPs so that only sellers meeting a first set of filter conditions receive said ~~[[FRPs]]~~ RFPs;

transmitting, to remotely located seller databases, the filter ~~[[FRPs]]~~ RFPs;

accepting quotes from sellers meeting said first set of filter conditions, and filtering said quotes so that only quotes meeting additional filter conditions are sent to a buyer requesting said quotes.

33. (Previously Presented) The method of claim 32 wherein said additional filter conditions are determined by said vendor.

34. (Previously Presented) The method of claim 32 wherein said additional filter conditions are determined by said filter means.

35. (New) A computerized system for forming a video communications system of members inclusive of buyers and/or vendors for processing requests for proposal for goods and services through at least one traffic control system, including:

Application No.: 09/316,430  
Amendment dated: November 20, 2003  
Reply to Office Action of: May 22, 2003

operating system software for controlling the traffic control system, said members being remotely located from said traffic control system and connected thereto via a communications channel, the traffic control system being coupled to a storage means containing identification of the members;

means for buyers to generate a request for proposal for goods and/or services;

means for transmitting said request for proposal to said traffic control system;

selection means for selecting the members in said storage means to determine which members are to receive said request for proposal based upon selection conditions set up by the buyer in said request for proposal or by the traffic control system in accordance with pre-established conditions;

means for communicating said request for proposal to the members selected by said selection means; and

means for responding to the generator of said request with either a response from the selected members or with a list of said selected members for said generator of said request to establish independent communication.

36. (New) A computerized system as defined in claim 35 wherein said members communicate via an on-line computer service through said traffic control system.

37. (New) A method for processing requests for proposal for goods and/or services from a party representing a buyer or supplier of goods and/or services through a computerized system forming a computer based communications system of members for linking buyers to suppliers with the computerized system having at least one traffic control system including operating system software for containing the identification of the members, wherein the method comprises the steps of:

receiving a buyer's request for proposal over a communication system;

Application No.: 09/316,430  
Amendment dated: November 20, 2003  
Reply to Office Action of: May 22, 2003

selecting one or more appropriate vendors to be sent the buyer's request for proposal based upon selection conditions, set by the buyer, vendor and the system software;

transmitting the buyer's request for proposal separately to said selected vendors over said communications system; and with said selected vendors over said communications system; and

with said selected vendors communicating their proposals either directly to the buyer or to the computerized system which in turn transmits said received proposals to the requesting buyer.

38. (New) A computerized system for engaging in transactions over a data system, said computerized system comprising:

a plurality of terminals, at least one of which being designated a requestor and others of which are designed vendor terminals;

selection and communication means for receiving, over said data system, requests from said requestor to engage in transactions with unspecified vendor terminals, and for determining which vendor terminals said requests should be matched; and

means for matching said requests with vendor terminals which meet predetermined selection conditions for generating quotes from information contained in a database associated with said vendor terminals, and for accepting said quotes from said vendor terminals, wherein the central database contains information that is insufficient to consummate the transaction.

39. (New) The computerized system of claim 38 further comprising means for communicating responses from said vendor terminals to said selection and communications means; and

means at said selection and communication means for communicating a selected set of said responses to said requestor.

Application No.: 09/316,430  
Amendment dated: November 20, 2003  
Reply to Office Action of: May 22, 2003

40. (New) The computerized system of claim 39 wherein said transaction is a purchase, and wherein the purchase may comprise a plurality of items.

41. (New) The system of claim 40 further comprising:

means for establishing communications between said selection and communication means and said vendor terminals which meet said selection conditions; and

means for determining whether a quote for said transaction from a particular vendor terminal meeting said selection conditions should be sent to said requestor.

42. (New) The method of claim 41 wherein said communications is continuous.

43. (New) The method of claim 41 wherein said communications are periodic.

44. (New) The method of claim 43 wherein said communications is initiated by said vendor terminal.

45. (New) The apparatus of claim 38 wherein further comprising means for automatically notifying a buyer when particular items meeting specified conditions become available from a seller.

46. (New) A method of purchasing goods or services over a data system, comprising the steps of:

communicating, over said data system, to a selection means, at least one request for a proposal from a potential buyer of said goods or services;

Application No.: 09/316,430  
Amendment dated: November 20, 2003  
Reply to Office Action of: May 22, 2003

selecting, at said selection means, the at least one request in order to ascertain a set of sellers potentially capable of supplying said goods or services; and

obtaining, from at least one of said potential sellers, over a data system, quotes to supply said goods or services, and forwarding said quotes to said potential buyer, wherein at least part of the quote information is stored at a location remote from said selection means.

47. (New) The method of claim 46 further comprising the step of accepting selection conditions from said potential buyer, and utilizing said selection conditions in said step of selecting to determine a subset of potentially capable sellers.

48. (New) The method of claim 46 wherein said step of obtaining comprises the step of each seller contacting said selection means at predetermined intervals and supplying bids in response to any requests for proposal that have arrived at said selection means and that were determined, by the selection means, to be a request for proposal for goods or services which said each seller is potentially capable of supplying.

49. (New) The method of claim 46 wherein said step of obtaining comprises the step of automatically and periodically supplying the selection means with information sufficient to assemble a bid, and sending the bid to said potential buyer via e-mail.

50. (New) A method of matching buyers of goods and services with sellers of goods and services over a data system comprising the steps of:

communicating, from buyers to a selection means, requests for proposals (RFPs);

processing said RFPs so that only sellers meeting a first set of selection conditions receive said RFPs;

transmitting, to remotely located seller databases, the selection RFPs;

Application No.: 09/316,430  
Amendment dated: November 20, 2003  
Reply to Office Action of: May 22, 2003

accepting quotes from sellers meeting said first set of selection conditions, and processing said quotes so that only quotes meeting additional selection conditions are sent to a buyer requesting said quotes.

51. (New) The method of claim 50 wherein said additional selection conditions are determined by said vendor.

52. (New) The method of claim 50 wherein said additional selection conditions are determined by said selection means.
